

HAYWIRE THIN NARRATIVE

Description of Sale Area

This sale consists of 5 cutting units within 3 payment units totaling 53 acres and will be sold as a tree measurement sale (2400-6T). There is an estimated 2052 ccf (or 1118 mbf) in this sale.

General Location

This sale is approximately 12 miles northeast of Yachats, Oregon and is in the Five Rivers watershed.

Routes of Access

Sale is appraised to Philomath, Oregon via Highways 34 and 20, county road 807 and National Forest System roads 3210, 3215, 3705 and 5800.

Relation to Other Sales

Skinner Thin, East Canal Thin, Missouri Thin and Meadow Thin are nearby and could share haul routes.

Marking

Subdivision boundaries are flagged with yellow ribbon, tagged with yellow boundary tags, and orange tracer paint slash on and above tag and at the stump. Douglas-fir is the only designated cut species and is Leave Tree Marked with orange tracer paint marks above and below stump height. Orange painted Douglas-fir and all other species will not be cut. Cutting units 1 and 4 have green tracer paint marked over the orange paint on trees where gaps were created. See logging systems map for the location of gaps.

Logging

This sale is appraised for 69% skyline yarding and 31% ground-based yarding. Yoder yarding is feasible for all skyline portions of this sale. Ground-based yarding will not be allowed on slopes greater than 30%. Elevated tailholds and intermediate supports will be needed to meet yarding objectives. Some downhill yarding is required. Directional felling is required. Full suspension is required when yarding across stream courses.

Roads and Other Developments

Approximately 0.14 miles of temporary roads and 17 landings are planned. Approximately 20 cubic yards of rock will be needed for temporary roads at the approach to all season system roads. Landings will need approximately 120 cubic yards of rock. Equipment on landings along roads 3210 and 5800 will partially block the road. Public traffic can expect temporary delays. These roads will be identified as "keep open" roads.

Road Maintenance

Purchaser will be responsible for prehaul, routine, seasonal, and post haul maintenance on system roads except for portions of roads 3210 where a deposit will be collected for road maintenance. Approximately 880 cubic yards of spot rock will be needed on system roads. Specific requirements to prevent the spread of invasive species are included in the road maintenance specifications.

Specified Road Reconstruction

There is no specified reconstruction for this sale.

Erosion Control

Purchaser will be required to block temporary roads, install waterbars on landings, skid trails, and temporary roads, and seed landings, skid trails and temporary roads. A coop deposit of \$0.38/ccf will be required for the cost of the seed that will be provided by the Forest Service.

Slash Disposal

Purchaser will be required to scatter or machine pile and cover landing slash at all landings. Purchaser shall scatter slash in cutting units along road 5800. Forest Service will burn piles.

Scaling

This is not a scaled sale.

Others

Seasonal restrictions apply. See contract for details.

Equipment cleaning is required before entering the sale area.
